

### REMARKS

Applicants are amending the specification herein to make a few minor amendments that were made and entered in the parent application. In particular, Applicants have amended page 3 of the specification at the first reference to "ppm" in the specification to recite -- parts per million -- , as opposed to "ppm", so that the term is understandable to all (as requested by the Examiner in the parent application). Applicants are also amending the specification as in the parent application to correct two minor errors therein. In particular, page 30, lns. 10-12 refer to:

"...described in Japanese Patent Application Laid-Open No. Hei 9-316567 or Japanese Patent Application Laid-Open No. Hei 10-254097 may be used."

Applicants believe that the publication number of each reference should also be referred to and that the original reference should not have recited "laid open." More specifically, Japanese application no. 9-316567 is publication no. 11-133463 and is already of record and has been considered by the Examiner in the present application. Japanese application no. 10-254097 is publication no. 2001-56485. Accordingly, Applicants wish to amend the specification to make this clear.

As no new matter is believed to be added by any of these amendments, it is requested that this amendment be entered in the present application.

Applicants are also adding new claims to prosecute in this application.

If any fee is due for this submission, please charge our Deposit Account No. 50-1039.
